

Make Oil Yourself...

Introducing

®

SEEDS2Oil

SPECIAL MACHINE - COLD OIL PRESS

A cute, compact 5.5 Kg,
machine for modern living

Rugged, strong and easy to operate

The crusher system made
of food grade stainless steel

Low power consumption,
1 Unit for 6 litres of oil

Low noise level (Less than 70 dB)

A technology that brings back traditional cold-crush process to liberate you from the grip of unhealthy packs.

Why should you make oil on your own

- The oils which are heat-processed for "refinement" end up losing all useful fats, minerals and vitamins and increase source of bad cholesterol.
- In most of the branded oils, preserving chemicals are added to prolong the shelf life, diluting the natural attributes and inviting undesired side - effects.
- In certain cases, to compensate the processing cost, oils are found to be blended with mineral oils like liquid paraffin.
